ANNUAL VEGETATION MANAGEMENT PROGRAM

Each year, CN is required to manage vegetation on its right-of-way. Managing this vegetation contributes to mitigating fire risks and enhances the efficiency of inspection of track infrastructure. The spray program is not being done for aesthetic reasons.

To ensure safe railway operations, CN will conduct its annual spray program on its rail lines in the province of Ontario. A certified professional (Davey Tree Expert Company of Canada, Ltd., 1-800-465-6367) will apply herbicides on and around the railway tracks (primarily along the 24-foot graveled area/ballast). Product requirements for setbacks in the vicinity of dwellings, aquatic environments and municipal water supplies will be met.

CN may use the following herbicides and active ingredients:

- Arsenal Powerline (Imazapyr 26.7%, BASF),
- Aspect (Picloram 97.5g/L, 2,4-D 360g/L, Corteva)
- Clearview (Aminopyralid 52.5%, Metsulfuron-methyl 9.45%, Corteva)
- Credit Xtreme (Glyphosate 540g/L, Nufarm)
- Detail (Saflufenacil 342g/L, BASF)
